

JustBSocial.eu

Small Tech vs. Big Tech • Putting users back in control

OPEN SOURCE

BIG TECH GOLIATH

- Algorithms & Outrage
- Locked Walled Gardens

VS

SMALL TECH DAVID

- Open Standard (ActivityPub)
- Chronological & Free

The Big Tech Giant

Trapped in Walled Gardens: You can't take your followers or network with you if you decide to leave.

Outrage Algorithms: Engineered for rage-bait, doomscrolling, and maximizing ad revenue. **You Are the Product:** Constant data tracking, profile building, and targeted ad harvesting.

JustBSocial.eu (David)

Decentralized & Open: Built on ActivityPub. Interact freely across the global Fediverse. **Chronological Feed:** Real-time posts. No secret black-box algorithm deciding what you see. **Privacy First:** No tracking, no data selling, and zero intrusive sponsored post spam.

Why Small Tech & Open Source are the Future

No Vendor Lock-In

Open protocols mean you own your graph. Migrate or connect across platforms without losing your social circle.

Genuine Human Connection

A digital town square focused on meaningful conversations, community health, and user autonomy.

European Data Sovereignty

Hosted on EU soil with full GDPR compliance and deep respect for individual privacy rights.

Transparent Technology

No corporate hidden agendas or black-box manipulations. Just clean, open, and auditable software.

Ready to leave the Giant behind?
